

Rural Health and Medical Training for Far North Queensland

Party: Australian Labor Party

Summary of proposal:

The proposal would provide funding over 4 years from 2022-23 to improve rural health care in Far North Queensland. It includes 2 components and would end on 30 June 2026.

Component 1 would create an additional 20 Commonwealth Supported Places (CSPs) per year from 2023 for 3 years for medicine at James Cook University.

Component 2 would provide support for the education, training and placement of doctors in hospitals in Far North Queensland through the North Queensland Primary Health Network with the following funding profile.

| \$m | 2022-23 | 2023-24 | 2024-25 | 2025-26 |
|-------------|---------|---------|---------|---------|
| Component 2 | -3.1 | -5.4 | -5.6 | -6.3 |

Costing overview

The proposal would be expected to decrease the fiscal balance by \$26.2 million, the underlying cash balance by \$25.9 million and the headline cash balance by \$27.6 million over the 2022-23 Budget forward estimates period. This impact predominantly reflects an increase in administered expenses.

The proposal would be expected to have an impact beyond the 2022-23 Budget forward estimates period. A breakdown of the financial implications over the period to 2032-33 is provided at Attachment A.

The financial implications of this proposal are sensitive to the assumptions around the uptake and completion of the additional CSPs and the inherent uncertainties in the baseline estimates for the relevant student loan programs, including uncertainties around existing estimates of debts not expected to be repaid and limited information regarding loan repayment profiles.

Consistent with the *Parliamentary Budget Office (PBO) Guidance 02/2015*, public debt interest expense impacts have been included in this costing because the concessional loans affected by this proposal involve financial asset transactions.

The fiscal, underlying cash and headline cash balance impacts differ in the treatment of interest payments and the flow of loan principal. In particular, only the fiscal balance reflects loan indexation and remissions, and only the headline cash balance includes transactions related to loan principal amounts. The impact on net debt will be broadly consistent with movements in the headline cash balance. A note on the accounting treatment of concessional loans is included at Attachment B.

Table 1: Financial implications (\$m)^(a)

| | 2022-23 | 2023-24 | 2024-25 | 2025-26 | Total to 2025-26 |
|-------------------------|---------|---------|---------|---------|------------------|
| Fiscal balance | -3.4 | -6.5 | -7.5 | -8.8 | -26.2 |
| Underlying cash balance | -3.4 | -6.4 | -7.4 | -8.7 | -25.9 |
| Headline cash balance | -3.5 | -6.7 | -8.0 | -9.4 | -27.6 |

(a) A positive number represents an increase in the relevant budget balance; a negative number represents a decrease.

Key assumptions

The Parliamentary Budget Office (PBO) has made the following assumptions in costing this proposal.

- Each CSP would be for a 5-year degree and all commencing students would finish their degree.
- There would be sufficient capacity and demand for the additional CSPs.
- After the 3 years of additional CSPs, the number of commencing CSPs would return to the baseline allocation.
- Departmental expenses would not be significant and would be absorbed within existing resources.

Methodology

The financial implications of Component 1 were estimated consistent with modelling for the 2022-23 Budget measure *Build on the Government's Investment in Rural Medical Training*, provided by the Department of Finance.

- Costs for the CSPs were derived using the Commonwealth Grants Scheme and Higher Education Loan Program estimates models provided by the Department of Education, Skills and Employment.

The financial implications of Component 2 were as specified.

Financial implications were rounded consistent with the PBO's rounding rules as outlined on the PBO Costings and budget information webpage.¹

Data sources

The Department of Finance provided the costing model as well as the underlying data for this proposal.

The Department of Education, Skills and Employment provided the Commonwealth Grants Scheme and Higher Education Loan Program estimates models as at the *Budget 2022-23*.

Attachment B – Accounting treatment of concessional loans

A concessional loan is a loan provided on more favourable terms than the borrower could obtain in the financial market. The most common concession is a below-market interest rate, but concessions can also include favourable repayment conditions. The income contingent loans available through the Higher Education Loan Program are an example of concessional loans offered by the Australian Government.

Budget impact²

The accounting treatment of concessional loans differs across each budget aggregate. The underlying cash balance only captures actual flows of interest related to the loans. The headline cash balance captures actual flows of principal as well as interest. The fiscal balance captures accrued interest, the value of the concession and any write-offs related to the loans. The interest cost of financing these loans is captured in all budget aggregates, and is separately identified by the PBO.³ Table B1 provides information about the detail provided in a costing. The provision of concessional loans decreases the Australian Government's net worth if the liabilities issued (the value of Australian Government Securities issued to finance the loans) are greater than the assets created (measured at their 'fair value' or price at which the loans could be sold).

Treatment of debt not expected to be repaid

All budget aggregates take into account estimates of the share of loans not expected to be repaid when calculating interest flows and estimating the value of the concession that is being provided. None of the measures capture the direct impact on net worth of the loans not expected to be repaid. If a portion of loans are not expected to be repaid, estimates of the 'fair value' of the loans outstanding will be reduced. Such reductions, both when loans are issued and if loans are subsequently re-valued, are recorded in the budget under 'other economic flows' which are reflected in net worth but not in the budget aggregates.

Table B1: Components of concessional loan financial impacts in costing proposals

| Budget item | Appears in | Comments |
|--|-----------------------|---|
| Interest accrued or received | All budget aggregates | Captures the interest accrued or expected to be received on the fair value of the debt. (The budget cannot include interest income on a debt that is not expected to be repaid.) |
| Concessional loan discount expense and unwinding revenue | Fiscal balance | The net present value of the concession (based on the difference between the market and concessional interest rates) is captured as an expense in the fiscal balance. As loans are repaid, the remaining value of the concession reduces, so this expense is 'unwound' with a positive impact on the fiscal balance. The concessional discount and its unwinding are not recognised in cash balances as there is no cash inflow or outflow. |
| Write-offs | Fiscal balance | Debt forgiveness, also known as mutually agreed write-downs (for example in the case of the death of the borrower of a HELP loan) are expensed when they occur, reducing the fiscal balance. These transactions do not affect the cash balances as no cash flows occur. |
| Initial loan; principal repayments | Headline cash balance | Higher estimates of loans not expected to be repaid lowers principal repayments. These transactions are not included in the fiscal balance or underlying cash balance as they involve the exchange of one financial asset (loan) for another (cash). |
| Public debt interest (PDI) | All budget aggregates | The PDI impact is the cost of the change in the government's borrowing requirements to fund the loans. The net headline cash balance impact excluding PDI is used to estimate the proposal's impact on PDI payments. |

² The PBO's treatment of these loans is consistent with the Department of Finance costing guidelines.

³ This is in accordance with *PBO Guidance 02/2015* and the Charter of Budget Honesty Policy Costing Guidelines which specify that costings of proposals that 'involve transactions of financial assets' need to take into account the impact on PDI payments.
