# EXPLORING YOUR RESULTS

Take time to understand your report. Consider your response rate to determine how representative your results are of the views of your colleagues.

Most questions in this report have information about the proportion of colleagues responding positively, neutrally or negatively.

Identify the areas where you are performing well. These will tend to be high results which are notably above any comparative results. Celebrate these results.

Identify areas that need improvement. These will be the lower results, and/or those which are scoring notably below your comparators.

Generally a difference of  $-/+$  5 percentage points is worthy of attention, but the size of the group is important. Changes in small groups can be unreliable.
